Man Group raises record US\$805 million in latest product launch

Man Group plc, the global provider of alternative investment products and futures broker, today announces that its most recent launch Man RMF Multi-Style Ltd ('Man RMF Multi-Style') has raised the equivalent of US\$805 million of client money – a record figure for a Man Group global product launch.

Man RMF Multi-Style was a global offering in three currency classes, Euros, US dollars and Swiss francs. The product's portfolio will invest in five complementary hedge fund styles - equity hedged, event driven, global macro, managed futures and relative value. RMF Multi-Style incorporates a principal protection structure that guarantees investors the return of at least 100% of their initial investment at maturity, provided by Bank of America, N.A., London Branch, as well as a potential profit lock-in feature.

Stanley Fink, Chief Executive of the Man Group plc, today said:

"This excellent result shows that demand amongst investors, who recognise the value of the diversification our products bring to their investment portfolios, remains very strong. The record US\$805 million is particularly impressive given that Man RMF Multi-Style represents a new product family.

This new and exciting product combines RMF's investment selection expertise, asset allocation and risk management skills with the added benefits of Man Investments' structuring capabilities and has the potential to help diversify and improve the risk-adjusted returns of an investment portfolio."

The responsibility for the content, construction and management of the Man RMF Multi-Style portfolio rests with RMF, one of Man Investment's core managers having become part of the Man Group in May 2002. The versatile investment model RMF has developed means it has the flexibility to create a broad spectrum of portfolios differentiated mainly by the extent of diversification and exposure they offer to particular styles, strategies and managers. In addition, one of RMF's key strengths is its ISO-certified investment process, which helps reduce investment risk and increases the probability of delivering consistent and repeatable outcomes.

The next global launch will be Man Global Strategies Diversified Series 2 Ltd, which will be open for investment on 3 May 2004. This product will target medium-term annualised growth of around 13-15% for an annualised volatility of around 7-8% for both USD and EUR class bonds while the CHF class bonds will target annualised growth of around 12-14% for annualised volatility of around 7-8%.
